**Blue Haze Spurge**  
*Euphorbia 'Blue Haze'*

Plant Height: 12 inches

Flower Height: 18 inches

Spread: 3 feet

Sunlight: ☉ ●

Hardiness Zone: 6

**Description:**

A great compact and colorful edger plant in the garden, or in pots, with its airy powder blue foliage; interesting chartreuse flowers on rose stems from mid summer on adds to the colorful display.

**Ornamental Features**

Blue Haze Spurge features showy yellow flowers with chartreuse bracts at the ends of the stems from mid summer to early fall. Its attractive narrow leaves remain powder blue in color throughout the year.

**Landscape Attributes**

Blue Haze Spurge is an herbaceous evergreen perennial with a mounded form. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant, and should be cut back in late fall in preparation for winter. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

Blue Haze Spurge is recommended for the following landscape applications;

- Accent
- Mass Planting
- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Container Planting

### Planting & Growing

Blue Haze Spurge will grow to be about 12 inches tall at maturity extending to 18 inches tall with the flowers, with a spread of 3 feet. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 8 years. As an evergreen perennial, this plant will typically keep its form and foliage year-round.

This plant does best in full sun to partial shade. It is very adaptable to both dry and moist growing conditions, but will not tolerate any standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil pH, but grows best in sandy soils. It is highly tolerant of urban pollution and will even thrive in inner city environments. Consider applying a thick mulch around the root zone in both summer and winter to conserve soil moisture and protect it in exposed locations or colder microclimates. This particular variety is an interspecific hybrid, and parts of it are known to be toxic to humans and animals, so care should be exercised in planting it around children and pets.

Blue Haze Spurge is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers and foliage against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, this plant may be too tender to survive the winter if left outdoors in a container. Contact our experts for more information on how to protect it over the winter months.
