Picante Burgundy Scarlet Sage

Salvia splendens 'Picante Burgundy'

Plant Height: 16 inches

Flower Height: 24 inches

Spread: 14 inches

Spacing: 12 inches

Sunlight: ☉

Hardiness Zone: (annual)

Other Names: Ornamental Sage, Tropical Sage

Description:

A fine salvia producing large spikes of burgundy-red blooms all season; a beautiful addition to borders or containers with its dense and bushy form, looks fantastic in containers

Ornamental Features

Picante Burgundy Scarlet Sage has masses of beautiful spikes of burgundy tubular flowers with red overtones rising above the foliage from late spring to early fall, which are most effective when planted in groupings. The flowers are excellent for cutting. Its attractive pointy leaves remain dark green in color throughout the season.

Landscape Attributes

Picante Burgundy Scarlet Sage is an herbaceous annual with an upright spreading habit of growth. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant. Trim off the flower heads after they fade and die to encourage more blooms late into the season. It is a good choice for attracting bees, butterflies and hummingbirds to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Picante Burgundy Scarlet Sage is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Container Planting

Planting & Growing

Picante Burgundy Scarlet Sage will grow to be about 16 inches tall at maturity extending to 24 inches tall with the flowers, with a spread of 14 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 12 inches apart. Although it's not a true annual, this plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant should only be grown in full sunlight. It is very adaptable to both dry and moist locations, and should do just fine under typical garden conditions. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Picante Burgundy Scarlet Sage is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
