**Reaflor® Real Glory Shasta Daisy**  
*Leucanthemum x superbum 'Real Glory'*

Height: 26 inches

Spread: 18 inches

Spacing: 16 inches

Sunlight: ○ ●

Hardiness Zone: 4

Group/Class: Reaflor Series

**Description:**

A pretty variety producing sunny white blooms with golden centers and a frilly yellow ring; a beautiful addition to the garden when massed; blooms throughout the summer

**Ornamental Features**

Reaflor Real Glory Shasta Daisy has masses of beautiful white daisy flowers with gold eyes and a yellow ring at the ends of the stems from early to late summer, which are most effective when planted in groupings. The flowers are excellent for cutting. Its serrated narrow leaves remain dark green in color throughout the season.

**Landscape Attributes**

Reaflor Real Glory Shasta Daisy is an herbaceous perennial with an upright spreading habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This plant will require occasional maintenance and upkeep. Trim off the flower heads after they fade and die to encourage more blooms late into the season. It is a good choice for attracting butterflies to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Insects

Reaflor Real Glory Shasta Daisy is recommended for the following landscape applications;

### **Planting & Growing**

Reaflor Real Glory Shasta Daisy will grow to be about 22 inches tall at maturity, with a spread of 18 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 16 inches apart. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 5 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Reaflor Real Glory Shasta Daisy is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
