### Spider's Web Japanese Fatsia

*Fatsia japonica* 'Spider's Web'

Height: 5 feet

Spread: 4 feet

Sunlight: ● ●

Hardiness Zone: 7

#### Description:

This stunning plant has huge palmate dark green leaves that are speckled with white as its principle attraction; perfect for creating a tropical look; it takes about 3 years for it to show speckling so be patient

#### Features & Attributes

Spider's Web Japanese Fatsia features showy clusters of white pincushion flowers rising above the foliage in mid fall. Its attractive large glossy lobed palmate leaves remain green in color with distinctive white spots throughout the year.

This is a multi-stemmed evergreen houseplant with an upright spreading habit of growth. This plant may benefit from an occasional pruning to look its best.

### Planting & Growing

When grown indoors, Spider's Web Japanese Fatsia can be expected to grow to be about 5 feet tall at maturity, with a spread of 4 feet. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 40 years. This houseplant performs well in both bright or indirect sunlight and strong artificial light, and can therefore be situated in almost any well-lit room or location. It does best in average to evenly moist soil, but will not tolerate standing water. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It is not particular as to soil type or pH; an average potting soil should work just fine.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.

*-- THIS IS A HOUSEPLANT AND IS NOT MEANT TO SURVIVE THE WINTER OUTDOORS IN OUR CLIMATE --*
