### Berry White® Hydrangea

*Hydrangea paniculata* 'Renba'

Height: 6 feet

Spread: 5 feet

Sunlight: ☉ ● ●

Hardiness Zone: 3

#### Description:

A showy garden shrub valued for its cone-shaped panicles of elegant flowers that start out white in July, then progresses to dark pink; color shades can vary according to location, climate, and type of soil; strong, upright stems

#### Ornamental Features

Berry White Hydrangea features bold conical white flowers at the ends of the branches from early summer to mid fall. The flowers are excellent for cutting. It has green deciduous foliage. The pointy leaves do not develop any appreciable fall color.

#### Landscape Attributes

Berry White Hydrangea is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its relatively coarse texture can be used to stand it apart from other landscape plants with finer foliage.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It has no significant negative characteristics.

Berry White Hydrangea is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

### **Planting & Growing**

Berry White Hydrangea will grow to be about 6 feet tall at maturity, with a spread of 5 feet. It tends to be a little leggy, with a typical clearance of 1 foot from the ground, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for 40 years or more.

This shrub performs well in both full sun and full shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This is a selected variety of a species not originally from North America.
