**NuMex Sunrise Pepper**  
*Capsicum annuum 'NuMex Sunrise'*

Height: 3 feet

Spread: 18 inches

Spacing: 24 inches

Sunlight: ☉

Hardiness Zone: (annual)

Group/Class: Hot Chili

**Description:**

A wonderful bushy variety that produces high yields of 6" long, mildly hot peppers; ripens from green to sunshine yellow; sweet and crunchy, excellent for drying and making ristras or eating fresh in salads, stuffing or grilling; harvest at any stage

**Edible Qualities**

NuMex Sunrise Pepper is an annual vegetable plant that is typically grown for its edible qualities. It produces large light green long peppers (which are technically 'berries') which can be harvested at any point. The fruit will often fade to yellow over time. The peppers have a spicy taste and a crunchy texture.

The peppers are most often used in the following ways:

- Eating When Cooked/Prepared
- Cooking
- Baking
- Drying
- Pickling

**Planting & Growing**

NuMex Sunrise Pepper will grow to be about 3 feet tall at maturity, with a spread of 18 inches. When planted in rows, individual plants should be spaced approximately 24 inches apart. This vegetable plant is an annual, which means that it will grow for one season in your garden and then die after producing a crop.

Better Plants. Better Advice. Better Results.

---

This plant is typically grown in a designated vegetable garden. It should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil pH, but grows best in rich soils. It is somewhat tolerant of urban pollution. Consider applying a thick mulch around the root zone over the growing season to conserve soil moisture. This is a selected variety of a species not originally from North America.

NuMex Sunrise Pepper is a good choice for the vegetable garden, but it is also well-suited for use in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
