## PartyTime™ Reggae Salmon Coleus

*Solenostemon scutellarioides* 'PartyTime Reggae Salmon'

Height: 20 inches

Spread: 24 inches

Spacing: 20 inches

Sunlight: ○ ● ●

Hardiness Zone: (annual)

Other Names: Flame Nettle, Painted Nettle

Group/Class: PartyTime Series

### Description:

A wonderful variety featuring burgundy foliage with salmon centers and lime green edges; ideal for combination planters, bed and borders; compact, well branched habit with trailing tendencies; heat and shade tolerant; easy to grow and low maintenance

### Ornamental Features

PartyTime Reggae Salmon Coleus' attractive serrated pointy leaves remain burgundy in color with distinctive green edges throughout the year on a plant with a mounded habit of growth.

### Landscape Attributes

PartyTime Reggae Salmon Coleus is an herbaceous annual with a mounded form. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant. The flowers of this plant may actually detract from its ornamental features, so they can be removed as they appear. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

PartyTime Reggae Salmon Coleus is recommended for the following landscape applications;

### **Planting & Growing**

PartyTime Reggae Salmon Coleus will grow to be about 20 inches tall at maturity, with a spread of 24 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 20 inches apart. Although it's not a true annual, this fast-growing plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant performs well in both full sun and full shade. It requires an evenly moist well-drained soil for optimal growth, but will die in standing water. It may require supplemental watering during periods of drought or extended heat. This plant should not require much in the way of fertilizing once established, although it may appreciate a shot of general-purpose fertilizer from time to time early in the growing season. It is not particular as to soil pH, but grows best in rich soils. It is highly tolerant of urban pollution and will even thrive in inner city environments. Consider applying a thick mulch around the root zone over the growing season to conserve soil moisture. This is a selected variety of a species not originally from North America. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

PartyTime Reggae Salmon Coleus is a fine choice for the garden, but it is also a good selection for planting in outdoor containers and hanging baskets. It can be used either as 'filler' or as a 'thriller' in the 'spiller-thriller-filler' container combination, depending on the height and form of the other plants used in the container planting. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
