All Gold Hakone Grass
Hakonechloa macra 'All Gold'

Height: 18 inches
Spread: 24 inches
Sunlight: ●
Hardiness Zone: 5

Other Names: Japanese Woodland Grass

Description:

Graceful arching grassy foliage is gold colored and almost bamboo-like, makes a spectacular color accent in the garden, beautiful along pathways, edges and containers; provide good drainage; can have nice reddish-tan color in fall

Ornamental Features

All Gold Hakone Grass is primarily valued in the garden for its cascading habit of growth. Its attractive grassy leaves are gold in color. The foliage often turns tan in fall.

Landscape Attributes

All Gold Hakone Grass is a dense herbaceous perennial grass with a shapely form and gracefully arching stems. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and usually looks its best without pruning, although it will tolerate pruning. It has no significant negative characteristics.

All Gold Hakone Grass is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Naturalizing And Woodland Gardens
- Container Planting

Better Plants. Better Advice. Better Results.

Planting & Growing

All Gold Hakone Grass will grow to be about 18 inches tall at maturity, with a spread of 24 inches. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 15 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant should be grown in a location with partial shade. Keep it away from hot, dry locations that receive direct afternoon sun or which get reflected sunlight, such as against the south side of a white wall. It requires an evenly moist well-drained soil for optimal growth, but will die in standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. Consider applying a thick mulch around the root zone in both summer and winter to conserve soil moisture and protect it in exposed locations or colder microclimates. This is a selected variety of a species not originally from North America.

All Gold Hakone Grass is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a canvas of foliage against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
