**Autumn Magic Black Chokeberry**  
*Aronia melanocarpa 'Autumn Magic'*

Height: 4 feet

Spread: 3 feet

Sunlight: ○ ●

Hardiness Zone: 3

**Description:**

A compact shrub with glossy dark green leaves, showy white flowers, glossy black berries, and red and purple fall colors; a great choice for massing or grouping, deserving of much greater use in the landscape

**Ornamental Features**

Autumn Magic Black Chokeberry features showy panicles of white flowers with brick red anthers at the ends of the branches in mid spring. It features an abundance of magnificent black berries from late summer to late winter. It has forest green deciduous foliage. The glossy oval leaves turn an outstanding dark red in the fall.

**Landscape Attributes**

Autumn Magic Black Chokeberry is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting birds and bees to your yard. It has no significant negative characteristics.

Autumn Magic Black Chokeberry is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Naturalizing And Woodland Gardens

### Planting & Growing

Autumn Magic Black Chokeberry will grow to be about 4 feet tall at maturity, with a spread of 3 feet. It tends to be a little leggy, with a typical clearance of 1 foot from the ground. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub does best in full sun to partial shade. It is an amazingly adaptable plant, tolerating both dry conditions and even some standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH, and is able to handle environmental salt. It is somewhat tolerant of urban pollution. Consider applying a thick mulch around the root zone in both summer and winter to conserve soil moisture and protect it in exposed locations or colder microclimates. This is a selection of a native North American species.
