**Albert Greenberg Tropical Water Lily**  
*Nymphaea 'Albert Greenberg'*

Height: 10 inches

Spread: 6 feet

Sunlight: ○ ●

Hardiness Zone: 4

Other Names: Waterlily

**Description:**

Tropical water lily with apricot pink star-shaped flowers from summer to winter; round mottled foliage is huge; easy to care for; water lilies dislike moving water; annual in colder climates

**Ornamental Features**

Albert Greenberg Tropical Water Lily features showy fragrant semi-double hot pink cup-shaped flowers with peach overtones and yellow eyes at the ends of the stems from early summer to late fall. The flowers are excellent for cutting. Its attractive large glossy round leaves emerge burgundy in spring, turning dark green in color with distinctive brick red spots the rest of the year.

**Landscape Attributes**

Albert Greenberg Tropical Water Lily is an herbaceous evergreen perennial with a low habit of growth, spreading atop the surface of the water. Its relatively coarse texture can be used to stand it apart from other garden plants with finer foliage.

This plant will require occasional maintenance and upkeep, and should be cut back in late fall in preparation for winter. It has no significant negative characteristics.

Albert Greenberg Tropical Water Lily is ideally suited for growing in a pond, water garden or patio water container, and is recommended for the following landscape applications;

- Water Gardens
- Naturalizing And Woodland Gardens
- Container Planting
- Bog Gardens

### **Planting & Growing**

Albert Greenberg Tropical Water Lily will grow to be about 8 inches tall at maturity, with a spread of 6 feet. Its foliage tends to remain low and dense right to the water. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 10 years. As an evergreen perennial, this plant will typically keep its form and foliage year-round.

This plant does best in full sun to partial shade. As an aquatic plant, it requires a suitable water garden environment and will benefit from special planting and ongoing care practices; consult one of our in-store experts for further details and instructions. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Albert Greenberg Tropical Water Lily is a fine choice for the water garden, but it is also a good selection for planting in outdoor pots and containers. Because of its spreading habit of growth, it is ideally suited for use as a 'spiller' in the 'spiller-thriller-filler' container combination; plant it near the edges where it can spill gracefully over the pot. Note that when grown in outdoor pots and containers, aquatic plants like this one will require a special growing environment that meets their requirement for consistent moisture.
