### **Anna's Promise Rose**

***Rosa 'WEKdoofat'***

Height: 5 feet

Spread: 4 feet

Sunlight: ○

Hardiness Zone: 4

Other Names: Downtown Abbey Rose

Group/Class: Grandiflora Rose

#### **Description:**

This variety, with a spicy, fruity fragrance produces a unique color combination of golden petals with a pink blush and bronzy reverses, above the deep green foliage; blooms on strong stems are perfect for cutting; excellent disease resistance

#### **Ornamental Features**

Anna's Promise Rose features showy fragrant double gold flowers with pink overtones and a coppery-bronze reverse at the ends of the branches from early summer to mid fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall color.

#### **Landscape Attributes**

Anna's Promise Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Anna's Promise Rose is recommended for the following landscape applications;

### **Planting & Growing**

Anna's Promise Rose will grow to be about 5 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
