**Rubra Lily Pad Begonia**  
*Begonia nelumbifolia 'Rubra'*

Height: 3 feet

Spread: 4 feet

Spacing: 3 feet

Sunlight: ● ●

Hardiness Zone: (annual)

Other Names: Lily pad Begonia, Lotus Leaved Begonia

**Description:**

An outstanding begonia with huge, rounded glossy green leaves for a visual impact in the garden; clusters of cream blooms rise above the foliage in late winter into spring; grows well in humid conditions and can get quite large in frost free climates

**Ornamental Features**

Rubra Lily Pad Begonia features dainty clusters of creamy white flowers rising above the foliage from late winter to early spring. Its attractive large glossy round leaves remain dark green in color with distinctive crimson veins throughout the year.

**Landscape Attributes**

Rubra Lily Pad Begonia is a dense herbaceous annual with a mounded form. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant, and usually looks its best without pruning, although it will tolerate pruning. It is a good choice for attracting birds, bees and butterflies to your yard. It has no significant negative characteristics.

Rubra Lily Pad Begonia is recommended for the following landscape applications;

- Accent
- Mass Planting
- General Garden Use
- Container Planting

### Planting & Growing

Rubra Lily Pad Begonia will grow to be about 30 inches tall at maturity, with a spread of 4 feet. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 3 feet apart. Although it's not a true annual, this plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant does best in partial shade to full shade. Keep it well away from hot, dry locations that receive direct afternoon sun or which get reflected sunlight, such as against the south side of a white wall. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is particular about its soil conditions, with a strong preference for rich, acidic soils. It is somewhat tolerant of urban pollution. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This is a selected variety of a species not originally from North America.

Rubra Lily Pad Begonia is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. Because of its height, it is often used as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
