### Verdi Cauliflower

*Brassica oleracea var. botrytis 'Verdi'*

Height: 16 inches

Spread: 20 inches

Spacing: 18 inches

Sunlight: ☉ ☐

Hardiness Zone: (annual)

#### Description:

Perfect for summer or fall harvests, this variety produces beautiful chartreuse colored heads of tightly packed curds; easy to grow and cold tolerant, great for home or market gardens; mild and crunchy, delicious cooked or raw; retains color when cooked

#### Edible Qualities

Verdi Cauliflower is an annual vegetable plant that is commonly grown for its edible qualities. The large round green tightly-wrapped heads of foliage are typically harvested when mature. The heads have a mild taste and a crunchy texture.

The heads are most often used in the following ways:

- Fresh Eating
- Eating When Cooked/Prepared
- Cooking
- Freezing

#### Planting & Growing

Verdi Cauliflower will grow to be about 16 inches tall at maturity, with a spread of 20 inches. When planted in rows, individual plants should be spaced approximately 18 inches apart. This fast-growing vegetable plant is an annual, which means that it will grow for one season in your garden and then die after producing a crop.

This plant is typically grown in a designated vegetable garden. It does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. This plant is a heavy feeder that requires frequent fertilizing throughout the growing season to perform at its best. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America.
