**Bonanza™ Bee Marigold**

*Tagetes patula 'PAS2258'*

Height: 12 inches

Spread: 8 inches

Spacing: 6 inches

Sunlight: ☉

Hardiness Zone: (annual)

Other Names: French Marigold

Group/Class: Bonanza Series

**Description:**

This fast flowering and dwarf variety features large, vibrant, double crested blooms sitting above fragrant green foliage; heat tolerant and low maintenance make this selection an eye-catching addition to landscapes and containers

**Ornamental Features**

Bonanza Bee Marigold features bold lightly-scented semi-double burgundy pincushion flowers with yellow edges at the ends of the stems from late spring to late summer. The flowers are excellent for cutting. Its fragrant ferny leaves remain dark green in color throughout the season.

**Landscape Attributes**

Bonanza Bee Marigold is an herbaceous annual with an upright spreading habit of growth. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect.

This is a relatively low maintenance plant. Trim off the flower heads after they fade and die to encourage more blooms late into the season. It is a good choice for attracting bees to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Bonanza Bee Marigold is recommended for the following landscape applications;

### **Planting & Growing**

Bonanza Bee Marigold will grow to be about 12 inches tall at maturity, with a spread of 8 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 6 inches apart. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. This fast-growing annual will normally live for one full growing season, needing replacement the following year.

This plant should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.

Bonanza Bee Marigold is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the larger thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
