**Angelwings® Pink Angelonia**  
*Angelonia angustifolia 'Angelwings Pink'*

Plant Height: 12 inches  
Flower Height: 18 inches  
Spread: 16 inches  
Spacing: 12 inches  
Sunlight: ☉  
Hardiness Zone: (annual)  
Other Names: Summer Snapdragon  
Group/Class: Angelwings Series

**Description:**

A beautiful variety presenting airy, pink bi-colored snapdragon-like flowers all summer; a spiky look that is great for massing; perfect for cottage gardens, borders, and containers; tolerates heat, humidity, and drought, once established

**Ornamental Features**

Angelwings Pink Angelonia has masses of beautiful spikes of pink pea-like flowers with ruby-red overtones rising above the foliage from late spring to late summer, which are most effective when planted in groupings. The flowers are excellent for cutting. Its small fragrant narrow leaves remain green in color throughout the year.

**Landscape Attributes**

Angelwings Pink Angelonia is an herbaceous annual with an upright spreading habit of growth. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This plant will require occasional maintenance and upkeep, and should not require much pruning, except when necessary, such as to remove dieback. It is a good choice for attracting butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Angelwings Pink Angelonia is recommended for the following landscape applications;

### **Planting & Growing**

Angelwings Pink Angelonia will grow to be about 12 inches tall at maturity extending to 18 inches tall with the flowers, with a spread of 16 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 12 inches apart. Although it's not a true annual, this fast-growing plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. This plant should not require much in the way of fertilizing once established, although it may appreciate a shot of general-purpose fertilizer from time to time early in the growing season. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Angelwings Pink Angelonia is a fine choice for the garden, but it is also a good selection for planting in outdoor containers and hanging baskets. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the larger thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
