

4D<sup>™</sup> Harvest Moon African Daisy Osteospermum 'KLEOE18043'

Plant Height: 8 inches Flower Height: 12 inches Spread: 16 inches Spacing: 14 inches Sunlight: O Hardiness Zone: (annual) Group/Class: 4D Series

## **Description:**

The next dimension in double osteos, this variety stays open all day and night; exhibits improved branching and better series uniformity in size; a showy presentation in the garden or in containers

### **Ornamental Features**

4D Harvest Moon African Daisy is covered in stunning semi-double peach pincushion flowers with deep purple centers at the ends of the stems from late spring to mid fall. The flowers are excellent for cutting. Its spiny narrow leaves remain green in color throughout the season.

### Landscape Attributes

4D Harvest Moon African Daisy is an herbaceous annual with a mounded form. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This plant will require occasional maintenance and upkeep. Trim off the flower heads after they fade and die to encourage more blooms late into the season. It is a good choice for attracting bees and butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

4D Harvest Moon African Daisy is recommended for the following landscape applications;

11301 S. Virginia Street Reno, NV 89511 (775) 853-1319

**Pyramid Way Garden Center** 3397 Pyramid Way Sparks, NV 89431 (775) 425-4300

# Better Plants. Better Advice. Better Results.

- Mass Planting
- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Container Planting
- Hanging Baskets

### **Planting & Growing**

4D Harvest Moon African Daisy will grow to be about 8 inches tall at maturity extending to 12 inches tall with the flowers, with a spread of 16 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 14 inches apart. Its foliage tends to remain low and dense right to the ground. Although it's not a true annual, this fast-growing plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. This plant should not require much in the way of fertilizing once established, although it may appreciate a shot of general-purpose fertilizer from time to time early in the growing season. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.

4D Harvest Moon African Daisy is a fine choice for the garden, but it is also a good selection for planting in outdoor containers and hanging baskets. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
