### **Mardi Gras Aeonium**

***Aeonium 'Mardi Gras'***

Height: 12 inches

Spread: 3 feet

Sunlight: ☉ ●

Hardiness Zone: 9

#### **Description:**

This striking Aeonium features yellow and green striped leaves that turn electric pink and lime green, forming a stunning display; grown primarily for foliage; water deeply but infrequently; its exotic form is perfect for containers in bright indoor areas

#### **Features & Attributes**

Mardi Gras Aeonium is primarily valued in the home for its ornamental upright and spreading habit of growth. Its attractive succulent narrow compound leaves emerge buttery yellow, turning lime green in color with distinctive hot pink edges and tinges of purple throughout the year.

This is an herbaceous evergreen houseplant with an upright spreading habit of growth. This plant usually looks its best without pruning, although it will tolerate pruning.

### Planting & Growing

When grown indoors, Mardi Gras Aeonium can be expected to grow to be about 12 inches tall at maturity, with a spread of 3 feet. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 10 years. This houseplant will do well in a location that gets either direct or indirect sunlight, although it will usually require a more brightly-lit environment than what artificial indoor lighting alone can provide. It prefers dry to average moisture levels with very well-drained soil, and may die if left in standing water for any length of time. This plant should be watered when the surface of the soil gets dry, and will need watering approximately once each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. Like most succulents and cacti, it prefers to grow in poor soils and should therefore never be fertilized. It is not particular as to soil type or pH; an average potting soil should work just fine.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.
