### **Bluety Agapanthus**

***Agapanthus 'Bluety'***

Plant Height: 18 inches

Flower Height: 30 inches

Spread: 30 inches

Sunlight: ☉ ● ●

Hardiness Zone: (annual)

Other Names: Lily of the Nile

#### **Description:**

This variety produces clumps of luxurious, strap shaped green foliage; pale blue flowers with darker blue stripes down the center of each petal, appear in mid-summer on tall stems; a perfect accent planting in the garden or massed along borders

#### **Ornamental Features**

Bluety Agapanthus features bold clusters of sky blue trumpet-shaped flowers with white overtones and royal blue stripes rising above the foliage from early to mid summer, which emerge from distinctive royal blue flower buds. The flowers are excellent for cutting. Its narrow leaves remain dark green in color throughout the year.

#### **Landscape Attributes**

Bluety Agapanthus is an herbaceous annual with a rigidly upright and towering form. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This plant will require occasional maintenance and upkeep, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting bees and butterflies to your yard. It has no significant negative characteristics.

Bluety Agapanthus is recommended for the following landscape applications;

- Accent
- Mass Planting
- General Garden Use
- Container Planting

### Planting & Growing

Bluet Agapanthus will grow to be about 18 inches tall at maturity extending to 30 inches tall with the flowers, with a spread of 30 inches. Although it's not a true annual, this plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant performs well in both full sun and full shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It may require supplemental watering during periods of drought or extended heat. To help this plant achieve its best flowering performance, periodically apply a flower-boosting fertilizer from early spring through into the active growing season. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Bluet Agapanthus is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
