### **Vivid Violet Pincushion Flower**

***Scabiosa 'Vivid Violet'***

Plant Height: 8 inches

Flower Height: 15 inches

Spread: 15 inches

Spacing: 12 inches

Sunlight: ☉

Hardiness Zone: 3

Other Names: Scabious

#### **Description:**

Large intensely violet-colored flowers hover and sway over the low mounds of foliage continuously throughout the summer on this improved mildew resistant pincushion flower.

#### **Ornamental Features**

Vivid Violet Pincushion Flower features unusual violet pincushion flowers at the ends of the stems from late spring to early fall. The flowers are excellent for cutting. Its deeply cut ferny leaves remain grayish green in color throughout the season.

#### **Landscape Attributes**

Vivid Violet Pincushion Flower is an herbaceous perennial with tall flower stalks held atop a low mound of foliage. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect.

This is a relatively low maintenance plant, and should be cut back in late fall in preparation for winter. It is a good choice for attracting bees and butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Vivid Violet Pincushion Flower is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Container Planting

### Planting & Growing

Vivid Violet Pincushion Flower will grow to be about 8 inches tall at maturity extending to 15 inches tall with the flowers, with a spread of 15 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 12 inches apart. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant should only be grown in full sunlight. It prefers to grow in average to dry locations, and dislikes excessive moisture. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. Consider applying a thick mulch around the root zone in both summer and winter to conserve soil moisture and protect it in exposed locations or colder microclimates. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Vivid Violet Pincushion Flower is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the larger thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
